Pinzette • Pinzetten • Tissue and dressing pliers • Précelles

**Pinzette**

Strumenti di vario disegno e tipologia atti ad afferrare tessuti di diversa natura.

**Pinzette chirurgiche**

Sono particolarmente indicate per afferrare il tessuto gengivale in modo idoneo affinché l'operatore possa infilare l'ago di sutura attraverso il lembo. Da usarsi con estrema cautela al fine di evitare lacerazioni del tessuto durante gli interventi chirurgici.

**Pinzetten**

Instrumente von unterschiedlicher Form und Typologie zum Festhalten verschiedener Gewebearten.

**Chirurgische Pinzetten**

Eignen sich hervorragend zum Festhalten des Zahnfleischgewebes, so daß die Nadel beim Ausführen von Nähten sicher durch den Gewebelappen gestochen werden kann. Achten Sie bitte bei chirurgischen Eingriffen darauf, daß das Gewebe nicht verletzt wird.

**Tissue and dressing pliers**

Instruments with a varying layout and typology which are used to grasp miscellaneous kinds of tissue.

**Tissue pliers with surgical spurs**

These instruments are particularly indicated for grasping gingival tissue so that a suture needle can be inserted through the flap. Must be used with great caution during surgical procedures to avoid lacerating the tissue.

**Précelles**

Instruments ayant différents dessins et typologies et servant à saisir des tissus de différente nature.

**Précelles chirurgicales**

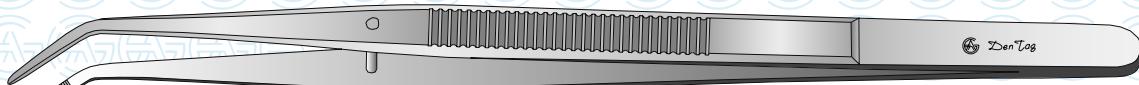

Elles sont particulièrement indiquées pour saisir le tissu gingival de façon adéquate pour que l'opérateur puisse enfiler l'aiguille de suture à travers le lambeau. À utiliser avec très grande précaution afin d'éviter des lacerations du tissu pendant les interventions chirurgicales.
