**Scalpellini e lime per osso**

Strumenti usati in operazioni chirurgiche ed implantologia, servono per incidere, levigare e sezionare l'osso, usati per raggiungere la parte più interna e morbida del dente.

**Bone chisels and files**

Instruments used during surgical operations and when installing implants. Ideal for cutting, smoothing and sectioning the bone, these instruments are used to reach the soft inner part of teeth.

**Cinceles y limas para alveotomía**

Útiles en las operaciones quirúrgicas y en cirugía implantaria, estos instrumentos sirven para cortar, alisar y seccionar el hueso, y para alcanzar la parte más blanda del diente.
